

# BIM Expert/Modeler

Location: Munich

Start date: as of now

Duration: until project's completion

## ABOUT US:

N+P Innovation Design is a cutting-edge innovation design consultancy based in Munich, Vienna and Atlanta. Our team thrives on delivering future-forward, sustainable, and efficient design solutions. We are currently seeking a skilled BIM Expert/Modeler to join our team for the preliminary design phase of a landmark new airport development in the Middle East. N+P will serve as the Innovation consultant and Wayfinding expert, acting as a sub-consultant to the lead architect.

## ROLE OVERVIEW

The BIM Expert will play a pivotal role in the preliminary design phase, ensuring the integration of Building Information Modeling (BIM) methodologies to streamline design processes, improve collaboration, and optimize project outcomes. This role requires close collaboration with architects, designers engineers, and project stakeholders.

Key Responsibilities:

- Manage on behalf of N+P the development of BIM models for the preliminary design phase of the new airport project with a primary focus on signage and wayfinding elements.
- Coordinate with architects, designers, engineers, and other stakeholders to contribute to multi-disciplinary models.
- Perform clash detection and resolve coordination issues through BIM platforms.
- Manage and ensure BIM model accuracy, quality control, and adherence to project specifications.
- Stay informed of the latest BIM technologies and advocate for innovative solutions that enhance design efficiency and sustainability.

## YOUR PROFILE

- Bachelor's or Master's degree in Architecture, Engineering, or a related field.
- Minimum of 3-5 years of experience in BIM management, preferably on large-scale infrastructure or aviation projects.
- Proficiency in Autodesk Revit, Rhino, and other BIM-related software.
- Strong understanding of airport design, master planning, and aviation infrastructure.
- Experience in the early design phases and the ability to conceptualize and translate design ideas into BIM models.
- Excellent problem-solving, communication, and collaboration skills.
- Knowledge of international BIM standards and protocols.

Proven track record of working in multi-disciplinary teams and delivering high-quality BIM deliverables.

## APPLY NOW

If you are passionate about contributing to transformative airport project, we invite you to apply and be part of our visionary team.
